

Sl no	TRIVIA POST - PHASE 2 Upgradations	
	UI /UX	Admin Panel
1	Updation in settings screen	
2	Change in Logging page (updated background)	
3	Additional screen- extended signup page + list of language options	
4	Add new screen - list of live contents will be the first view (sample image will be shared)	
5	Change in content page (sample image will be shared- need exact view)	
6	Need one button below all the images in the content page to show the SOURCE OF THE ARTICLE (sample screen will be shared)	Can upload the source link
7	Categories (Topics) list will need images	Can upload categories (topics) images and headings
		Provision of re arrangement of Categories (topics) in the list- priority wise (up /down - in the list)
8	Users should be able to read in their native language	Need multiple regional language panel (translator tool)
		Currently no translators are available for Assamese language we need separate upload options for this language
	NA	With the option of auto translators in place, Admin should have the option of crosschecking of the regional contents, spelling mistakes, grammatical errors before approving / posting
		Set up cron job/ scheduler with half an hr gap - Feeds / uploaded contents scheduler
		Sub Admins access should be limited 1. only content posts 2. can view only - dashboard , categories and category wise posts
9	Need one single screen without image options on it - For posting inspirational quotes	Need to have separate single page/screen without image option and content should go from below
Additional assistance		
1	Need support in setting google analytics/ Firebase for monitoring activities on the app by the users	
2	Need support in setting up google adsense ad placements etc	
3	Might need single page website sooner or later *
